4.50

UCEAP Semester Units
3.00

Course Description

Scotland’s landscape has inspired poets and writers for generations. From the hills covered in purple heather to the glorious light at sunrise, almost every vista is an invitation to the enthusiastic visual journalist. At the same time, the protection of a diverse and sustainable environment has pushed an appreciation of the landscape to the top of the educational agenda. This is a unique module that enables students to appreciate the environment, enjoy the natural beauty of Scotland while learning and developing their skills at landscape photography. Students l learn the practice of landscape photography, but also the theory and principles. Students are provided with all the equipment they need, such as cameras, lenses, and tripods, access to a state of the art editing suite and the support and guidance of top professionals to ensure they return home with valuable new skills and a portfolio to impress and remember.
