## **Course Description**

This course explores key development challenges faced across developing countries and is divided into three sections. The first critically examines some of the major concepts, paradigms, and theories, which have attempted to define what development is, how and why it occurs (or does not), and to whose benefit. The second focuses on some of the key development challenges faced by developing countries: economic (poverty, inequality, unemployment), political (democracy, human rights, role of elites), social (religion, race/ethnicity/caste, urbanization), and natural (climate change, pollution, resource extraction, extermination of species). The final section explores possible remedies to these issues through international cooperation (trade, aid, finance, South-South cooperation), national policies (welfare schemes, laws and regulations), and micro and informal solutions.
