Course Description

Nature of Iceland: Students learn about the weather and climate, geology, vegetation, and animal life. They attend lectures about the geology of Iceland and go on fieldtrips to see volcanoes, hotspots, and lava, and they study the geography of the country. Environmental problems and nature conservation in Iceland are discussed. Field trips are an important ingredient of this part of the course, including birdwatching. Cultural legacy: The course gives an overview of Icelandic history and culture from medieval times to the present. Field trips are made to historical museums and art exhibits.
