UCEAP Course Suffix
UCEAP Official Title SYSTEM THINKING OF COMPLEX LIFE I
UCEAP Transcript Title SYSTEM THINKING I
UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description

This course aims to develop a new perspective to increase students' ability of dealing with complex matters from life and work. We introduce a system thinking derived from ancient Dao philosophy and modern quantum physics, which yields a methodology to be applied to such daily topics as keeping positivity, raising the ability of focusing the attention and of persistence, facing a difficulty, etc. These topics are discussed from a rational and system perspective, which involves a design of a series of methods to work out a solution. The scope is then shifted from personal topics to those of society, with the same system thinking methodology. We intend to create a platform for students to learn how to understand complex systems from both theory and practical sides.

Language(s) of Instruction
Chinese
