UCEAP Semester Units
3.30

Course Description

This course explores the opportunities and threats presented through cyberculture in our information society. It discusses the possibilities and limitations of improving living conditions inherent to scientific-technological development. This course analyzes the links between technology, law, philosophy, and social interests of the groups that promote and develop it. Topics include: the new information economy; human rights on the internet; expansion of beliefs, fundamentalism, and political phenomena such as populism via social networks; the new digital economy.
