Course Description

This course introduces the social, ethical, legal, and professional issues involved in the widespread deployment of information technology. It stimulates students to develop their own, well-argued positions on many of these issues.

Students think about the social and ethical implications of the widespread and sustainable use of IT; develop awareness of the laws and professional codes of conduct governing the IT industry; explore IT industry working practices, including the need for continuing professional development; develop information gathering skills; and adopt principled, reasoned stances on important issues in the topic area.
