5.30

#### **Course Description**

This course explores the development of ancient science and technology and its interrelation with Greco-Roman societies and the environment. The course encompasses the ancient Mediterranean area and the Near and Middle East and range from the Bronze age to the early Middle Ages, with a focus on the Roman period. It takes a wide view of technology, ranging from primitive tools and agriculture to automata (robots), aquaducts, and catapults. The course uses texts and archaeological evidence, and incorporates field and museum learning experiences as well as explaining the latest scientific advances.
