**UCEAP Transcript Title**

AIRCRAFT STRUCTURES

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

This course covers torsion of open and closed non-circular thin-walled sections; bending of unsymmetric thin-walled beams; idealized beams; multi-cell torque boxes and beams; tapered beams; introduction to mechanics of fiber-reinforced composites; classical lamination theory; failure theories for composites. This course is intended for students who are interested in the design and analysis of thin-walled structures, especially aircraft structures.

### Language(s) of Instruction

English

### Host Institution Course Number

ME4212

### Host Institution Course Title
