COURSE DETAIL

HIGH-DIMENSIONAL DATA ANALYSIS

Country
Korea, South

Host Institution
Yonsei University

Program(s)
Yonsei University

UCEAP Course Level
Upper Division

UCEAP Subject Area(s)
Statistics

UCEAP Course Number
110

UCEAP Course Suffix

UCEAP Official Title
HIGH-DIMENSIONAL DATA ANALYSIS

UCEAP Transcript Title
DATA ANALYSIS

UCEAP Quarter Units
4.50

UCEAP Semester Units
3.00

Course Description

This course covers recent statistical techniques in high dimensions and applies them to the analysis of real data. Students gain a broad understanding of various (non-convex) penalization techniques, dimensionality reduction, and more, with the goal of learning how to effectively summarize and interpret high-dimensional data and to systematically understand the challenges of analyzing data where the dimensionality of the data is comparable to or greater than the sample size.

Topics include introduction to high-dimensional data, regression in high-dimensions, (non-convex) penalization methods in high-dimensions, regression in high-dimensional with real-data applications, matrix estimation with rank constraints, graphical models for high-dimensional data, spectral clustering in high-dimensions, principal component analysis in high-dimensions, and quantile regression in high-dimensions.

Language(s) of Instruction
