REP/MULTI-LEVEL SYS

UCEAP Quarter Units
4.50

UCEAP Semester Units

3.00

Course Description

This course explores the concept of democratic representation in multi-level systems, examining both theoretical foundations and practical case studies. It begins with an overview of key theories on democratic representation, exploring both the demand for representation by the public and the supply of representation by elected officials and institutions. In the latter half, case studies from various multi-level political systems illustrate how these theories apply in practice and how representation is shaped by institutional design.
