UCEAP Official Title NEW MONETARY AND FINANCIAL CHALLENGES
UCEAP Transcript Title NEW MONETARY CHALL
UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description

From international monetary system issues to climate challenges, crypto-assets, the fight against financial crime, international sanctions, sovereign debt restructuring, and the role of the shareholder state, this course examines the major monetary and financial issues of the 21st century. It explores strategies for adapting central banks and the financial system to these new challenges, whether they relate to monetary policy, financial stability, or the financing of the economy. This course has three key objectives: to equip students with an in-depth mastery of the fundamentals of monetary and financial economics for a better understanding of current economic events, to shed light on the changing role of central banks and international financial institutions, and to offer the opportunity to meet experts to guide students in their career choices.

Language(s) of Instruction
