OPTIONS, FUTURES, AND OTHER FINANCIAL DERIVATIVES

**UCEAP Transcript Title**

FINANCL DERIVATIVES

**UCEAP Quarter Units**

5.50

**UCEAP Semester Units**

3.70

### **Course Description**

The course delivers the concepts and models underlying the modern analysis and pricing of financial derivatives. The philosophy of the course is to first provide the firm foundations for understanding derivatives in general. The required technical tools are explained carefully, allowing students to learn the language and to be able to converse with derivatives professionals. Once the tools are in place, those same tools can then be applied to any derivative. Special emphasis is put on those derivatives that shape the modern world. Students should feel comfortable with calculus, probability, and statistics at the intermediate undergraduate level before taking this course.

### **Language(s) of Instruction**

English

### **Host Institution Course Number**

FM360
