Course Description

In this course, students learn how organizations meet customer needs through effective planning, production, and service delivery; and designing, improving, and overseeing processes that transform resources into valuable products and services. Students gain a solid foundation in the principles and practices of Operations Management, with a focus on key concepts such as process design, quality control, supply chain management, and lean operations. Students learn the strategies used by successful organizations to streamline operations, reduce costs, and maximize value. Topics include case studies, simulations, and practical problem-solving scenarios.
