UCEAP Semester Units

4.00

Course Description

This curse is about the recent and quickly emerging trends of voluntary and mandatory reporting on sustainability issues. It develops knowledge and understanding of the history, theory, and practice of environmental, social, and sustainability accounting and deals with concepts such as accountability and stakeholders. The course provides students with a critical appreciation of the relevance and role of sustainability accounting and reporting in contemporary society as the world transitions to net zero carbon emissions and aims to further the United Nations' Sustainable Development Goals. The course critically examines current and emerging practices in corporate settings including voluntary practices, how well stakeholders' information needs are met, mandatory requirements, and greenwashing issues.
