4.00

Course Description

This course introduces and explains a range of concepts from set theory, philosophy of language and metaphysics, probability theory, and decision theory. These include the notions of set, cardinality, infinity, analyticity, necessity, possible worlds, reference, scope, probability, conditionals, utility, decision rules, dominance, backward induction. The emphasis is on basic ideas rather than on technical elaboration. The concepts are sketched, illustrated by examples, and made familiar via exercises.

Language(s) of Instruction
English
