UCEAP Official Title LEADING ORGANIZATIONAL CHANGE IN THE AGE OF GENERATIVE AI
UCEAP Transcript Title LEAD ORG CHANGE/AI
UCEAP Quarter Units 5.50
UCEAP Semester Units

3.70

Course Description

Organizations operate in an increasingly complex environment, where change is a constant feature of business life. As generative AI (GenAI) reshapes industries and transforms the way people work, understanding how to manage change and digital transformation becomes increasingly critical. While GenAI offers unparalleled opportunities to enhance efficiency and productivity, it also presents complex challenges for management. Taking a multidisciplinary, social science-based approach, this course equips students with the necessary leadership and change management skills to implement successful digital transformation projects. The course blends theory with hands-on learning, using case studies and an interactive simulation game, where students will apply their knowledge by making strategic decisions. Additionally, students gain practical experience through a real-life GenAI-focused consultancy project.

Language(s) of Instruction
English
