Geography Environmental Studies

**UCEAP Course Number**

140

**UCEAP Course Suffix****UCEAP Official Title**

GLOBAL ENVIRONMENTAL ISSUES: SCIENCE & SOLUTIONS

**UCEAP Transcript Title**

GLOBAL ENV ISSUES

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

The course enables students to gain a broad understanding of ten important environmental issues that have emerged during the Anthropocene, the science that underlies them, the various management and mitigation options and technologies, and how this links to policy. Topics include (as representative samples, which may change): deforestation, desertification and agricultural intensification, biodiversity loss, urbanization, pollution, ocean acidification, loss of polar environments, maintaining sustainability and ecosystem services, and understanding ecological systems and resilience.
