COURSE DETAIL

DATA FOR DATA SCIENTISTS
Country United Kingdom - England
Host Institution London School of Economics
Program(s) London School of Economics
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Statistics Computer Science
UCEAP Course Number 141
UCEAP Course Suffix
UCEAP Official Title DATA FOR DATA SCIENTISTS
UCEAP Transcript Title DATA/DATA SCIENTIST
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

Data science and machine learning are exciting new areas that combine scientific inquiry, statistical knowledge, substantive expertise, and computer programming. One of the main challenges for businesses and policy makers when using big data is to find people with the appropriate skills. Good data science requires experts that combine substantive knowledge with data analytical skills, which makes it a prime area for social scientists with an interest in quantitative methods. This course extends the foundation of probability and statistics with an introduction to the most important concepts in applied machine learning, with social science examples. It covers the main analytical methods from this field with hands-on applications using example datasets, so that students gain experience with and confidence in using the methods covered.

Language(s) of Instruction
English
