Course Description

This course focuses on accounting data used by managers to plan and control the operations of an organization. Students examine the design methodologies of management accounting systems that enhance the quality of management decision-making related to each function in the corporate value chain, namely research & development, design, manufacturing, marketing, distribution and customer service. Topics include cost structure analysis, various cost concepts, design methods of various costing systems, strategic decision makings using cost information, and performance measurement systems. This course provides students with contemporary management accounting techniques including ABC, Target Costing, Quality Costing, Lifecycle Costing, Balanced Scorecard, etc.
