Course Description

This course provides a step-by-step approach to tackle any personal, professional, or world issue imaginable. Learn techniques to clearly define problems, research solutions, weigh options, and implement plans. Gain the skills to transition from panic to possibility. This course takes an interactive, hands-on approach to building problem-solving skills. Through case studies, team projects, and simulations, students learn and practice key frameworks including defining problems, researching context and analyzing root causes, brainstorming creative solutions, evaluating options, planning implementation, and communicating and collaborating. The course provides abundant opportunities to apply problem-solving techniques to real-world issues. Students develop critical thinking, teamwork, communication, and creativity skills to become decisive, strategic problem solvers.
