## Course Description

This course is part of the Laurea Magistrale degree program and is intended for advanced level students. Enrollment is by permission of the instructor.

This course focuses on the following topics:

1. Market failures in health insurance: a) Adverse selection b) Moral hazard c) Other inefficiencies
2. Economic rationales for government intervention and redistribution
3. Insurance design and payment systems
4. Regulatory intervention and the public/private mix in health insurance
5. Comparative social insurance markets

At the end of the module, students: have knowledge of law and economics theories applied to insurance and social insurance markets and have insights on national, international, and comparative case studies; know how to utilize quantitative and qualitative information to analyze the impact of regulatory instruments on the efficiency of insurance and social insurance markets design, and critically develop proposals for optimal policy design.
