## Course Description

This course surveys various abnormal behaviors and mental disorders. The first part of the course introduces the major psychological theories (Psychodynamic Theory, Learning Theory, Cognitive-Behavioral Theory) as well as the biological and socio-cultural theories which explain the phenomena, causes, and treatment of abnormal behaviors and mental disorders.

In the second part, various phenomena and classification systems of mental disorders are presented. The focus is on psychological causes of various types of mental disorders: disorders related to anxiety, mood, and personality, somatoform disorders, dissociative disorders, schizophrenia, sex-related disorders, eating disorders, sleep disorders, alcoholism, mental disorders in childhood or adolescence.

In addition, the course covers the proper treatments for mental disorders as well as how to improve mental health in general.
