### **Course Description**

This course examines the many categories of wearable technology, as well as closely related fields, such as wearable computing, techno fashion, electronic textiles, intelligent jewelry and smart clothes. Students research, experiment with and design wearable technology projects, from conceptual work to pragmatic solutions and applications. Topics include how technology can be used in wearable contexts as a means to complement the functions of the human body and enhance personal expression. The course offers a theoretical introduction and foundation, which is iterated through practical elements in the form of concept development and prototyping.
