Course Description

This course discusses global health and health systems reforms in the Asia-Pacific Region, Africa, and OECD countries. The course also examines the financing, policy evaluation, and providing aspect of healthcare services. Key topics include health policy synthesis and evaluation; public policies reform addressing low birth rates; progress toward universal health coverage assessment; planetary health; multi-country data analysis; equity in health and social exclusion, and innovations in health financing system. The course emphasizes hands-on learning through extensive use of Microsoft Excel and statistical software package R.

Course Prerequisites: The course assumes basic knowledge of statistics. However, for those without prior experience, the course provides support to build a strong foundation in data analysis, statistical concepts, and the use of the R software package.
