5.00

UCEAP Semester Units

3.30

Course Description

From an ecocritical approach, this course explores the ways in which literature and culture represent, and interact with, the natural world, ecological consciousness, and social transformation. It examines how these issues and concerns are reflected in literary texts. This course also discusses a variety of critical approaches and literary responses to the period commonly referred to as the Anthropocene/Capitalocene, considering how literature can become a tool to promote environmental sustainability, multispecies dialogues, and social justice.

Language(s) of Instruction
