BRAIN & COGNITION

**UCEAP Quarter Units**

7.00

**UCEAP Semester Units**

4.70

## Course Description

This course examines biopsychology, sensation and perception, and cognitive processes. Topics will include sensation and perception, learning and memory, executive function and motor control. It considers these abilities and their underlying brain mechanisms across the developmental spectrum (from infancy to advanced ageing), as well as in populations with neurological conditions.

## Language(s) of Instruction

English
