UCEAP Semester Units 2.70

Course Description

This course recognizes and valorizes the contributions of animals throughout history in the sum of responding to the epistemological question. Can animals be individuals who enact their own intention and will who, through its own actions, create history with themselves as the protagonists? This course dives into socio-philosophical explorations of the parallel evolution of animal labor along with neoliberalism and capitalism while later linking its ties into the Latin American context.

Language(s) of Instruction
Spanish
