3.30

Course Description

This course examines how the Internet works and how everyday online activities generate data that are collected, analyzed, and monetized by digital platforms. It explores key issues related to data privacy, security, ownership, and control, addressing questions about how personal information is used and how individuals can protect themselves online. The course provides practical knowledge and tools for understanding Internet infrastructure, data tracking practices, and strategies for managing one's digital presence with greater confidence and awareness.
