4.50

UCEAP Semester Units
3.00

Course Description

This special topics course includes the following topics: How filmmakers use their depictions of robots, androids, and AI to comment on contemporary science, society and culture; How developments in real-world science and technology have influenced cinema, and how the real science of AI has been influenced by science fiction; How to analyze and interpret science fiction films in terms of their themes and symbolism (what is the message of this movie?) and historical significance (why was this film important, and what events from history influenced its creation?)

Students explore film analysis, terminology, and methodology through films, readings, group discussions, and debates.

Language(s) of Instruction
English
