BIODIVERSITY AND CONSERVATION OF NATURAL RESOURCES

UCEAP Transcript Title

BIODIV/CONSERVATION

UCEAP Quarter Units

6.00

UCEAP Semester Units

4.00

Course Description

This course examines key concepts and principles underpinning conservation and their application to conservation practice. Drawing on real-world examples from terrestrial and marine ecosystems, the course highlights the challenges and broader impacts of biodiversity conservation. It explores questions such as: Who owns wildlife? Who are the winners and losers of conservation interventions? Does it matter if tigers go extinct? Can hunting benefit conservation?

Language(s) of Instruction

English
