## **Course Description**

This course focuses on the legal responses to climate change in three contexts: international, comparative, and national laws. It begins with causes and effects of global climate change and the methods available to control and adopt to it. It then investigates the emergence of climate change regime and various policy tools nations employ, including emission trading, carbon tax, litigation, securities disclosures, and voluntary action. Relations with other legal regimes (e.g., human rights, trade, and environmental justice will also be examined.

Topics include Climate change and international law, Evolution of United Nations climate change regimes, Kyoto Protocol, Paris Agreement, Paris rulebook, Climate governance beyond the UN, Net zero, Green New Deal, Energy and climate change, corporate responsibility, climate liability, plastic pollution.
