URBAN DESIGN STUDIO FOR EMERGING FUTURE CITY

Country

Korea, South

Host Institution

Yonsei University

Program(s)

Yonsei University

UCEAP Course Level

Upper Division

UCEAP Subject Area(s)

Urban Studies

UCEAP Course Number

119

UCEAP Course Suffix**UCEAP Official Title**

URBAN DESIGN STUDIO FOR EMERGING FUTURE CITY

UCEAP Transcript Title

URBAN DESIGN STUDIO

UCEAP Quarter Units

4.50

UCEAP Semester Units

3.00

Course Description

In this studio course, students acquire knowledge and hands-on experience at the intersection of cityscapes, artificial intelligence, and data-driven site analysis and urban design development methods. The lectures focus on the theoretical background of data metrics relevant to urban design. The hands-on sessions help students gain technical skills needed to apply the knowledge. Students apply the theories and skills to analyze the study site, extract current issues, and develop concepts and directions for design interventions. The goal is to acquire foundational knowledge on the theoretical basis, measurement methods, and limitations of key quantitative indicators related to urban design, and learn how to select indicators that align with the objectives of a design project. Students acquire skills in data acquisition and preprocessing; learn how to generate, post-process, and analyze indicators using various spatial data and artificial intelligence; and develop effective communication methods through visualization. Students also learn the process of applying data analysis techniques to the design site to assess current conditions, identify issues and challenges, and establish a foundation for developing planning concepts and alternatives.
