

# COURSE DETAIL

## CLINICAL AND COGNITIVE NEUROSCIENCE

**Country**

Australia

**Host Institution**

University of New South Wales

**Program(s)**

University of New South Wales

**UCEAP Course Level**

Upper Division

**UCEAP Subject Area(s)**

Psychology

**UCEAP Course Number**

132

**UCEAP Course Suffix****UCEAP Official Title**

CLINICAL AND COGNITIVE NEUROSCIENCE

**UCEAP Transcript Title**

CLIN&COGN NEUROSCI

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

This course examines major systems of the brain from the perspective of clinical neuroscience and covers behavior, cognition, emotion and development. It looks at theoretical models of the aetiology and neural mechanisms of clinical pathologies (such as anxiety, depression, psychosis), as well as considers wellbeing and cognition, and the research evidence supporting them. Research methods in clinical and cognitive neuroscience, including experimental, analogue, genetic, imaging, longitudinal and epidemiological studies will be covered to outline the strengths and limitations of these techniques.

### Language(s) of Instruction

English

### Host Institution Course Number

PSYC3202

### Host Institution Course Title

CLINICAL AND COGNITIVE NEUROSCIENCE
