Course Description

This course communicates the key concepts in modern corporate finance in explaining how corporations make financial decisions, focusing on investment decision (decision to purchase real assets) and financing decision (decision on how to finance this investment). Corporations make these decisions towards fulfilling the financial goal of the corporation, which is maximizing shareholder value. This course therefore covers some computation techniques to value corporations and investments. This course also considers how these financial decisions could be affected by the market, social, and legal environments. Additionally, the course covers the topics of mergers and sustainable corporate finance.
