Course Description

This course offers a sweeping introduction to some of the momentous changes which have taken place in Europe over the past five hundred years. It explores some of the major landmarks in Europe's social, political, and economic development: the development of European Empires, religious change, witchcraft, the industrial revolution, democratic change, war in the modern world, the Cold War, and socio-cultural change since 1945. There is one lecture every week which introduces students to these themes, but the heart of the course lies in the seminars. Here, students are encouraged to challenge interpretations of the past, to debate ideas, and to draw on primary evidence.
