UCEAP Official Title
TRANSFORMATIVE SUSTAINABILITY PRACTICES FOR SYSTEMIC CHANGE

UCEAP Transcript Title
SUST SYSTEMC CHANGE

UCEAP Quarter Units
5.00

UCEAP Semester Units

3.30

Course Description

This course is designed to advance conceptual and applied understanding of bottom-up approaches in sustainability governance. Students are offered theories and concepts to understand the emergence and persistence of unsustainable practices and are equipped to propose which elements of these practices should change to achieve more sustainable outcomes. This regards individual and household practices, as well as the degree to which actions, rules, norms and values applied by governments, international bodies and private rule-making authorities like NGOs and companies are equipped to shape everyday practices. Be introduced to theories and concepts that address the interaction between everyday practices, transformations, systemic change and governance. Students are expected to have basic knowledge about social science theories of the environment, e.g. those presented in Social-Scientific Analysis of Environmental Issues (ENP24803).
