## Course Description

This course introduces basic facts and theoretical models regarding economic interconnections within an increasingly integrated world. The course provides students a global view and understanding of interdependence among all countries. Its content includes a current and an historical overview of trade and its impact on economic growth, the classic theory of free trade, recent developments in theoretical models and relevant empirical evidence and major policy issues arising in open economies that are becoming more relevant today. The course covers traditional (neoclassical) economics and also discuss various challenges presented to such a framework, especially based on experience of developing countries.
