PHYSIOLOGICAL PSYCH

**UCEAP Quarter Units**

4.50

**UCEAP Semester Units**

3.00

## Course Description

This course provides an understanding of the neural basis of behavior and mind. It introduces the field of neuroscience and behavioral neurobiology from a biological perspective, incorporating both evolutionary and physiological approaches to behavior. Topics include the structure and function of the nervous system, genetic and biochemical models of behavior, hormones and behavior, the biological bases of learning, cognition, communication, and language, and the evolution of social organization.
