## Course Description

This course provides students with the knowledge and skills commonly adopted in practice to implement Enterprise Risk Management (ERM) framework utilizing risk management qualitative and quantitative methods. The course addresses how to identify, assess, control, and respond to risks for an enterprise and also integrates risks with business strategy to improve performance. In addition, the course identifies environmental, social, and governance (ESG) related risks to be incorporated into ERM framework. Last, this course introduces the practical implementation and application of financial risk management covering market, liquidity, credit, and operational risk measurement and management from the viewpoint of financial institutions.
