PHONETICS
Country Korea, South
Host Institution Korea University
Program(s) Korea University
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Linguistics
UCEAP Course Number 102
UCEAP Course Suffix
UCEAP Official Title PHONETICS
UCEAP Transcript Title PHONETICS
UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description

This course introduces students to the basics of Articulatory and Acoustic Phonetics, with a focus on American English and Korean sounds. The course enhances understanding of the fundamental articulatory principles for consonants and vowels. Additionally, students learn to use the speech analysis software 'Praat' to explore the acoustic properties of sounds.

Students first examine Articulatory Phonetics - The articulatory mechanisms of human speech; The articulatory principles of consonants and vowels; and Allophones and narrow transcription. The second half of the course covers Acoustic Phonetics - The theoretical background for acoustic measurements of human speech and their physical mechanisms - and includes laboratory (experimental) sessions analyzing the acoustic properties of English and Korean vowels and consonants.
