Course Description

In this course, students analyze the main physical and human characteristics of the continent and of contemporary Chile. Students gain a critical understanding of the changes and permanences in the geographical and physical and humane spaces of the continent and the conceptual grounds of the geographical spaces (landscape, territory, place, region, localization and scale) for its application into interdisciplinary research. Topics includes the physical geographical space of the Americas, regional synthesis of Chile, and the regional development of the country.
