### **Course Description**

For much of its recent history, the development speculative fiction has been driven - sometimes quietly, sometimes less so - by the pages of magazines. This course is about two interconnected things: the place of the short story in the history of science fiction and fantasy, and the place of science fiction and fantasy in magazine print culture of the last 140 years. Students read some of the most iconic short stories in the genre, and also the magazines in which they appeared, tracing the evolution of both genre and medium across the long twentieth century.
