UCEAP Course Suffix
UCEAP Official Title PUBLIC HEALTH: FROM THEORY TO PRACTICE
UCEAP Transcript Title PH: THEORY TO PRAC
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course brings teachers and students from different disciplines together to understand and combine the roles different disciplines to support a healthy society through public health. The overall objective of this program is to develop a comprehensive understanding of public health, and to acquire specific skills to apply this knowledge. This course includes practical examples, and this includes field visits within the Dutch setting. For example, the course investigates public health services like newborn, child and youth services, vaccinations, screening, and how these services provide support to vulnerable populations that are usually underrepresented in health dialogues. These examples are used to reflect on other global public health practices to understand a broad range of community health issues in the socio-political and cultural contexts in which they occur. Students participating in this course act as “experts” in their field and work in an interdisciplinary team to understand health systems in place. Students much be upper division standing in a related major.
