EARTH VS. HUMANS: SUSTAINABLE PRACTICES AND ENVIRONMENTAL AWARENESS

**UCEAP Transcript Title**

SUSTAINABLE PRACTCS

**UCEAP Quarter Units**

4.50

## **UCEAP Semester Units**

3.00

### **Course Description**

The first portion of this course focuses on comprehending ideas presented by Thom Hartmann, the key author that has helped influence the discussion of key environmental and social issues of the latter 20th century and early 21st century (influencing such people as celebrity Leonardo DiCaprio and politician Bernie Sanders).

In this process, we examine the harmful aspects of city-state culture, such as competition, domination, and excess, as well as positive tribal values such as being part of nature, cooperation, care, and sharing. Students explore knowledge and skills needed to enhance their understanding of the interconnectedness of all living things, promote environmental awareness, and create a more sustainable future.

The second half of the semester involves practical “hands-on” discovery as students choose their own issue to research, to discover what the author may have missed and even how the world has or hasn’t changed since the author wrote his book.
