Course Description

The Spanish Civil War is one of the iconic events of the 1930s, capturing the attention of the world from its outbreak in July 1936. But the conflict was also deeply embedded in the broader history of its era, not just as a prelude to the Second World War but also as a reflection of deeper patterns of imperialism and anti-colonialism, internationalism, social conflict, religious belief and political violence. This course explores the uniquely Spanish features and origins of the conflict, but also asks how the Spanish Civil War can help us to understand the global interwar crisis in all its dimensions.
