Course Description

This course provides a broad-based introduction to the study of behavior and mental processes. It provides students with an overview of contemporary psychological approaches to the study of human behaviors and its contribution to our knowledge of human functioning. Topics include learning, development, psychotherapy, the brain and states of consciousness, sensation and perception, memory, social behavior, personality, psychological disorders, coping and health, stress, and others. Emphasis will be placed on application of theories in everyday life.
