### **Course Description**

This seminar introduces students to the style, structure, and content of the UCL BSc Psychology program. The seminars develop key academic skills relevant to the range of disciplines that are studied in scientific psychology: including cognition, perception, developmental psychology, neuroscience and health psychology. Students on the course learn academic skills that are required on UCL's program (in particular report and essay writing, and critical assessment of research papers) and which are particular to UK system in general and a British Psychological Society accredited BSc Psychology degree program in particular.
