Course Description

Why do some companies succeed while others fail? The efficient use of resources in organizations and the harmonization and alignment of various interests broadly define the topic of “corporate governance.” To shed some light on conceptual as well as practical issues in this area, this course first covers some aspects of financial management, with a particular focus on valuation and value-based management. The course then discusses how the governance of a corporation can be set up in order to enhance the value creation in the company. The course utilizes theoretical, conceptual material as well as case studies.
