Course Description

This course covers fixed income securities, the mechanisms of domestic and international debt markets, fixed income instrument analyses, pricing, risk behavior, the security design, debt instruments with complex structures, investment strategies and risk management of debt portfolios. It addresses the institutions and trading, arbitrage in the bond markets, volatility of bonds, valuation, and different types of bonds including corporate bonds. The course also presents an understanding of risks in investing in bonds specifically and other fixed income bond-like securities. It also teaches the basics of usage and valuation of some common fixed income derivatives. The course presents new and innovative instruments and issues in the fixed income market.
