Course Description

This course introduces the fundamental accounting principles and processes involved in mergers and acquisitions (M&A). It focuses on how financial information is used to evaluate potential acquisition targets and the subsequent accounting required after a merger. The course emphasizes practical applications of accounting data, helping students understand its role in strategic decision-making within the M&A context. Key topics include financial statement analysis, basic valuation methods, and an overview of the due diligence process. The course also touches on the legal aspects that influence accounting practices in M&A transactions.
